

HAND-HELD APPARATUS FOR INSTALLING FLASHOVER
PROTECTION COVERS ON ENERGIZED ELECTRICAL
CONDUCTORS AND EQUIPMENT

Abstract of the Disclosure

Hand-held devices that can be used to quickly
install flashover protection covers around energized
electrical conductors and equipment are provided. Each
device includes a guide assembly that defines a pair of
5 spaced-apart, converging passageways that are
configured to slidably receive the elongated edge
portions of a flexible panel therethrough. The
converging passageways force together the opposite edge
portions of a flexible panel being advanced through the
10 guide assembly.
